

# UNDERGRADUATE SUMMER SCHOOL

August 15 - 19, 2022

---

The Center for Matter at Atomic Pressure (CMAP) is holding a week-long summer program for undergraduate students who are eager to learn more about the physics of extreme states of matter!

CMAP consists of world-leading physicists, astrophysicists, and planetary scientists with expertise that spans theoretical and numerical modeling, and experiments. Over the course of a week, undergraduates will have access to modern computational and educational tools that they can leverage across a wide range of disciplines

CMAP will virtually host up to 50 students; each student will be introduced to the science of extreme pressure in an immersive, collaborative environment. This program aims to engage undergraduate students in the field of high-energy-density physics and promote a learning environment where they are exposed to new research tools and techniques.
